NAVIGARE SAILING SCHOOL

The Navigare Yachting Sailing School offers structured sailing courses developed by IYT – International Yacht Training Organization. IYT certificates are accepted worldwide and will allow you to rent a bareboat upon successful completion of the course.

The 2-week sailing course is held along the coast of the Mediterranean with the starting point near Split, in Croatia. All of our sailing instructors are highly trained and experienced skippers. The boats used for the course are new, comfortable, and modern.

By the completion of the course, you will receive an International Bareboat Skipper License, issued by IYT. Obtaining this certificate automatically qualifies you for an International Certificate of Competency (ICC), which is required to charter a bareboat in several destinations around the Mediterranean.

We believe that theoretical knowledge is best obtained through practice. At the Navigare Sailing School, we combine the classroom learning of sailing basics with the hands-on practice of sailing for 14 days.

Learn to sail and discover the world!

MAINTENANCE

Operating a fleet of over 300 yachts, entrusted to us by their owners, leaves no room for improvisation. The condition of our fleet is at the heart of our concerns and guarantees a high-quality experience for our charter guests and profitability for our owners.

Operating a fleet of over 300 yachts, entrusted to us by their owners, leaves no room for improvisation. Our main focus is to ensure that the vessels in our fleet are kept in good condition and that their value is maintained throughout the program. Transparency and attention to detail are at the heart of all the maintenance work that we do, with the ultimate objective of offering charter customers the luxury of enjoying yachts in perfect condition and allowing owners to exit the program at the end of the contract period with a yacht that still carries a high value.

Navigare boat owners expect stable profitability from us, which we can only guarantee by operating their sailing yachts – monohulls or sailing catamarans – as floating assets, smoothly and without surprises and with full transparency. To further deliver on the promise of an excellent maintenance program, we need indicators that enable our teams to monitor the condition of the yachts and catamarans entrusted to us.

We have therefore designed a customer interface enabling us and all of our boat owners to monitor the status of their yachts in real-time. The Navigare Service Platform gives the owner access to their boat's technical file, providing a full-service history of the vessel and thus increasing the resale value of the yacht. Furthermore, the Service Platform doubles as a ticketing system, allowing the boat owner to add tickets for maintenance work that are automatically assigned to our team of technicians.

The collection of this important data generates traceability of interventions, giving the boat owner a full-service history of the vessel. This "Service Book" is vital to secure a high resale value of the yacht. Navigare Yachting's vessels have a low depreciation, all thanks to our commitment to managing and maintaining the worth of our boat owners' investments.
